EDUCATION

National Forensic Sciences University

M.Sc. Digital Forensics and Information Security

Jaipur, India

Graduation: June 2027

- **Coursework:** Web Application Security, Malware Analysis and Forensics, and Network Security Forensics

California State University

Bachelors of Science in Computer Science

Sacramento, CA

Graduation: May 2024

EXPERIENCE

IT Contractor

Praveen Aggarwal Chartered Accountants

Dec 2025 – Jan 2026

New Delhi, India

- Architected an 80-user Active Directory environment from scratch and deployed a hybrid Active Directory + Entra ID integrated SSL VPN on a Sophos XGS firewall with MFA and conditional access policies.
- Minimized data loss risk in disaster scenarios by implementing automated backup policies to Azure Blob Storage, meeting 24-hour RTO and 4-hour RPO targets.
- Reduced email infrastructure costs by 60% by migrating 20 mailboxes from Google Workspace to Microsoft 365.

Cybersecurity Analyst Intern

Ekvayu Tech Private Limited

Jun 2025 – Aug 2025

Noida, India

- Discovered and reduced attack surface for an internally developed security tool by remediating 15+ critical vulnerabilities via VAPT using Burp Suite and OWASP ZAP.
- Secured code repository infrastructure by migrating GitLab server while implementing configuration hardening, access controls, and least-privilege policies.
- Resolved 10 vulnerabilities across production servers and internal applications through Nessus-based threat assessments.

TECHNICAL PROJECTS

MedConnect | *Next.js, FastAPI, PostgreSQL, TypeScript, Docker, Keycloak, Redis*

Feb 2026 – Apr 2026

- Designed multi-tenant clinic architecture with scoped data access and consent workflows for multi-location management.
- Ensured ABDM-compliant data sharing across clinics by implementing a patient consent management system with link codes, approval workflows, and revocation support.
- Resolved 12+ production issues including N+1 queries, race conditions, and security misconfigurations to improve API reliability and security.

KK Society | *Next.js, Spring Boot, PostgreSQL, TypeScript, Docker, Auth0*

May 2025 – Dec 2025

- Audited and enforced Role-Based Access Control and rate limiting across 90+ API endpoints to mitigate broken access control and improve resilience against DoS attacks.
- Built a service request workflow with state management and tracking to improve request visibility and user experience.
- Integrated RazorPay payment gateway to streamline collections and management for 970 society members.

Incident Response and Malware Analysis | *Volatility, Wireshark, Kali Linux*

Nov 2025

- Identified indicators of compromise (IOCs) including hardcoded C2 URLs and malicious hashes through static malware analysis using strings, exiftool, and Detect It Easy.
- Conducted memory forensics using Volatility 3 to identify malicious processes and extract network artifacts.
- Designed Python scripts to automate hash extraction and VirusTotal lookups, accelerating IOC validation.

SKILLS

Languages: Python, Java, C/C++, SQL, Bash, PowerShell

Frameworks: React, Angular, Next.js, Spring Boot, FastAPI

Security Tools: Burp Suite, OWASP ZAP, Nessus, Nmap, Wireshark, Volatility, Autopsy

Developer Tools: Git, Docker, VS Code, JetBrains Suite
